Air Plant Light Requirements. As a general rule, keep your air plants out of direct sunlight. Remember, in the wild, many air plant species like to grow up in the sheltered, shady canopy of trees. They will do best if you can put them in a brightly lit spot out of the sun's rays.

### How to Grow and Care for Air Plants | Better Homes & Gardens

When it comes to indoor plant care, air plants ( Tillandsia) are supposed to be some of the easiest. For starters, they don't even need soil, absorbing water and nutrients through scales on their leaves—in the wild they survive just hanging onto the bark of trees and whatnot, catching whatever bit of rain and bird poop that comes their way.

### Care for Air Plants: 6 Tricks to Keep Them Alive - Sunset ...

Plants love air flow, as that is critical for the plant to exhale and transpire. Like us, plants breathe. Additionally, air flow is important for wicking away excess moisture in plants. For instance, Tillandsia, or air plants, often require frequent misting or soaking, and if water is left on their leaves, they'll often rot. Air flow is responsible for wicking away this moisture and keeping those plants happy and healthy.
