Canon 7d Manual Focus Point

Focus is quite possibly one of the most vague and mysterious things I've ever had to suss out in my photographic journey. It got ever-clearer (pun intended) when I got my Canon 7D. Even now, just admitting that I have one makes my heart skip a little beat. Ok...reeling in my inner geek. Let me tell you about the focus points available on the 7D.

Manual Focusing (EOS 7D Mark II) - Canon

To compare, all entry level Canon DSLRs and the X0D line-up feature a 9 point AF system. The picture on top shows the difference between the AF of the EOS 7D and the conventional 9 points AF system. The AF of the EOS 7D is highly configurable, for instance there is “Zone AF”, i.e. the 7D’s AF points can be grouped in 5 zones (pic below).

Understanding the Auto-Focus System of the Canon EOS 7D

When working with non-moving subjects in the One-Shot AF mode, the EOS 7D starts with all 19 AF points active. The camera will then use the point or points which “see” the nearest subject with adequate detail. Those points will be displayed in the viewfinder, along with the round green focus confirmation light at the bottom of the display.
