View In 2013, Honda began production of freshly designed K24W. It was an entirely new 2.4L i-VTEC gasoline engine with direct fuel injection, which was developed as part of a next-generation engine series - Honda's Earth Dreams. The K24W shares with previous K24 engines only the bore and stroke sizes. The overall design is completely different.

The Honda K-series engine is a line of four-cylinder four-stroke car engine introduced in 2001. The K-series engines are equipped with DOHC valvetrains and use roller rockers to reduce friction. The engines use a coil-on-plug, distributorless ignition system with a coil for each spark plug. This system
