Guide Metadata Manager User - Informatica

Metadata Manager contains models that define the classes, attributes, and relationships for different types of metadata sources. Metadata Manager packages models for many application, business glossary, business intelligence, data integration, data modeling, and relational metadata sources. You can create custom models for metadata source types for which Metadata Manager does not package a model.

metadata management and analysis.

10.4.0 - docs.informatica.com

To extract metadata from these sources, you first create an XConnect that represents the metadata source type. The XConnect includes the model for the metadata source. You then create one or more resources that are based on the model. The universal resources that you create behave like packaged resources in Metadata Manager.
