Thank you for the great article. I'd like to wire my inverter with your option # 4 but an RV tech said that I still need the converter running to power DC items in the trailer such as most lights, furnace fan, water pump, etc. So what I believe I need is to stop the converter from trying to charge the batteries when the inverter is on.

RV Inverter Install: Four Different DIY Methods to Get off ...

Here is a typical wiring diagram to illustrate installing a modern deck mount converter with a separate fuse panel. If your unit has a separate DC distribution panel located on a wall for instance, you do not need a new fuse panel unless you want to replace glass fuses with modern automotive style blade style fuses common in newer RVs.
